*

eNATUREcloud integrates waste management, environmental reporting, energy reporting and CO₂ tracking modules into one essential tool to define and monitor sustainability goals.

eNATUREcloud

Module Waste Management

The application for master data-based documentation and monitoring of operational material flow management processes in waste-generating companies. **eNATUREcloud** (waste management) maps the standard processes for the disposal of hazardous and non-hazardous waste in companies or on construction sites – ideal for small and medium-sized enterprises.

- In-house waste disposal logistics from disposal enquiry to warehouse management
- Disposal management from disposition to collection
- Verification of invoices/credit notes
- Statistical evaluation and controlling (disposed quantities, costs and revenues)

eNATUREcloud (Waste Management) supports the management and monitoring of:

- Contracts (service agreements) with waste disposal service providers
- Waste disposal projects Waste
- disposal certificates
- Waste generation points
- Waste fractions

- Supplier certification e.g. efB certificates
- Additional supporting evidence, e.g. in compliance with NachwV, GefAbfV, etc.
- Containers
- Cost centres

A wide range of evaluations ensure efficient controlling:

- Quantity of waste and recyclable materials disposed
- Disposal costs and revenues
- Certification and accountability requirements for internal and external stakeholders (e.g. authorities)
